

At Learn2Communicate we offer a variety of different services delivered across a school Term to meet your child's needs

## Individual Service

- This service involves individual appointments for your child with a speech pathologist
- Appointments offered may be face- to- face in one of our clinic locations, via Telehealth or at your child's school, preschool or home
- Appointments may also involve teacher consultations, case conferences and meetings with parents

- Appointments are scheduled on a weekly, fortnightly or less regular basis across a school Term. The ongoing need for therapy will be reviewed with you at the end of each block of therapy.
- This service type is suitable for children who are just starting to access Speech Pathology and for those who require an intensive, specialised approach to their intervention programmes
